Education

- Graphic Era Deemed to be University (Present)** Uttarakhand, India
Bachelor of Computer Science Specialization in AI ML 11/2021 - 06/2025
Secured GPA: 8.58

Skills

- Languages & Libraries:** Java ,Python, C/C++, SQL, TensorFlow, PyTorch, Keras, scikit-learn, Hugging Face
- GenAI & LLMs:** OpenAI APIs, LangChain, Prompt Engineering, GitHub Copilot
- Cloud & Platforms:** Azure (OpenAI, Functions), AWS (SageMaker, EC2, S3), GCP, Docker, Azure ,Kubernetes
- Tools:** Power BI (Foundation), Tableau(Foundation), Cursor, v0.dev, Bolt.new , Claude, OpenAI
- Database:** Supabase , MySQL , PostgreSQL
- Testing :** Evals, Pytest

Projects

- Price Optimization Model**
 - Optimized pricing strategy based on market and competitor analysis, boosting profitability by **20%**.
 - Increased projected profits by **15%** in six months through data-driven pricing recommendations.
 - Identified key sales drivers in the fitness sector using **ARIMA**, **Random Forest**, and **Gradient Boosting** techniques.
 - Achieved **25%** profit growth by incorporating competitor and consumer data into pricing.
- Floating Debris Detection System**
 - Developed a **CNN-LSTM** model to classify aquatic debris, providing insights into key waterway contaminants.
 - Designed three neural networks using **TensorFlow**, achieving over **92%** accuracy in debris detection with diverse datasets.
 - Curated a dataset of **10,000** labeled aquatic debris images, enabling accurate model training.
 - Implemented algorithms to identify factors impacting biodiversity, offering solutions for three major ecosystem threats.
- GenAI-Powered AMP Web Stories for E-Commerce**
 - Developed an end-to-end GenAI pipeline using LangChain and Azure OpenAI to auto-generate Google AMP-based web stories from e-commerce product data.
 - Integrated a product scraping pipeline with LLM-driven summarization to create SEO-optimized story content and visuals.
 - Automated layout generation and content flow to match AMP web story standards for mobile-first discovery and engagement.
 - Evaluated performance via A/B testing against manually created content, deploying stories through AWS Lambda and S3.
 - Documented the system and shared deployment best practices for scalable GenAI content generation workflows.

Publications

- Novel Recommendation System for Adventure Tourism (2024)** Presented innovative approaches to enhancing customer engagement at the 4th Global Conference for Advancement in Technology, engaging with over 150 industry professionals during networking sessions. **Publication Link:** [View Publication](#)
- Predictive Model for Cancer Biomarkers (2024)** Authored and delivered a detailed presentation on cancer biomarker prediction at the International Conference on Integration of Computational Intelligent Systems, fostering collaboration opportunities with three potential industry partners in Pune, Maharashtra, India. **Publication Link:** [View Publication](#)
- AI-Driven Marine Debris Detection Techniques (2024)** Presented findings at the IEEE Humanitarian Technology Conference, sparking discussions and potential collaborations with five leading environmental organizations for future research projects. **Publication Link:** [View Publication](#)

Work Experience

- Listerr : Data Scientist Intern** (July 2024 - October 2024)
 - Collaborated on building GenAI-powered conversational tools for product recommendations using OpenAI APIs.
 - Developed PoCs for integrating large language models (LLMs) to automate customer queries, achieving a 30% improvement in resolution time.
 - Utilized Azure OpenAI and Hugging Face Transformers to deploy client-facing NLP solutions in production environments.
 - Refactored legacy chatbot codebases into modular Python microservices using GitHub Copilot and best engineering practices.
 - Wrote technical documentation and presented solution architectures to stakeholders, accelerating internal adoption.

Certifications

- Tensorflow Developer Certificate ([Certificate](#))
- Certified Blockchain Professional v2 ([Certificate](#))

Extra Curricular Activities

- Finalist at Build For Bharat:** Achieved finalist status at Build For Bharat, an initiative by Google Cloud and ONGC, by developing an innovative scalable solution that enhanced user engagement on digital platforms, garnering recognition among the top 100 competitors.
- Collaborative Project at Graphthon:** Proposed the idea of **Suvichaar**, an AI-powered platform designed to enhance AI-driven insights for well-being of mental health. Led a collaborative effort during Graphthon, receiving accolades from industry experts and engaging with 100+ participants in feedback sessions, which significantly refined the final presentation.
